

**Examining the Factors Influencing Distance Learners in  
Learning Management System (LMS)**

Submitted in Partial Fulfilment of the Requirements for the Degree of  
Master of Science in Software Engineering

**By**

Marem Jabir M.Saleh Al- Hadeethi

**Supervisor**

Dr. Aysh Alhroob

Faculty of Information Technology  
Master Program of Software Engineering  
Isra University

2017 / 2018

The undersigned have examined the study entitled '*Examining the Factors Influencing Distance Learners in Learning Management System (LMS)*' presented by *Mariam J.Al Hadethi*, a candidate for the degree of Master of Science in Software Engineering and here by certify that it is worthy of acceptance.

## ***DEDICATION***

To the master of people and the superintend of messengers, our prophet Muhammad peace and  
best blessings be upon him

To Iraq which is the cradle of civilizations

To the Kingdom of Nishmi, Jordan

To beloved Palestine and Al-Quds

To our Arab nation and its people

To my parents, brothers, sisters, and all my relatives

I also dedicate this humble scientific effort to you, supplicating to Allah Almighty to be obtained  
satisfaction, acceptance and success in the service of our Arab nation and humanity.

**Author : Marem 2018**

## ***ACKNOWLEDGMENT***

Praise be to Allah who gives gifts, grants and donations, and by his wisdom divides them among his mankind.

After Allah Almighty has blessed to accomplish the current scientific thesis, I would like to express my sincere gratitude and appreciation to my Honorable Professor, Dr. Ayesh Al-Hroub, as well as Dean of the Faculty of Information Technology who has graciously supervised my thesis, where he has honored me with his knowledge, ethics, guidance and continuous devotion to serve the science and the nation. I pray for continuing his health and conciliation.

I would also like to express my sincere gratitude and appreciation to the presidency of Al-Isra University, its cadres and my professors who have willingly offer me knowledge and good scientific guidance during my studies including Prof. Mohammad Al-Fayoumi, Dr. Thamir Al-Rousan, Dr. Abdulsalam Arabiat, Dr. Odai Al-Ma'aytah, may God sustain you for this country.

I would also like to express my sincere gratitude and appreciation to all of those who have helped me to accomplish this thesis and to all the members of the Isra University, may God bless you.

## ABSTRACT

---

This studies about the adoption acceptance of technology and influencer the student's behaviours to accept technology in Jordanian universities. Many studies in the past have utilized previously tested models such as Technology Acceptance Model (TAM), unified theory of acceptance and use of technology (TPB), and related to accept the technology. This study presented a theoretical model based on the (TAM) & (TPB), and identifies the various factors associated with the incorporation of E-learning among students at Jordanian universities.

Factors are necessary conditions in order to increase user's intention to use E-learning applications. In light of the investigation of the hypothetical models the structure was produced for the examination. The greater part of the examinations observed these factors which are : (the culture of electronic learning system, uses of electronic learning, benefits of applying electronic learning system, perceived playfulness and difficulties of using the electronic learning) to be critical and affecting behavioural goal to receive innovation.

For the purpose of this particular a descriptive research used two methods. First the data collection methodology would be utilized a research questionnaire which would be administered and the details would be collected from students to achieve the research objectives. Second the data refers to the information which is gathered from various sources such as online journals, previous studies, online magazines and other sources such as books.

In this study the research instrument used classified into two segments. The first one is about the general questions which includes the demographic details of the participants who participated in this study. A total of 425 research questionnaire were distributed among the students in four different universities in Jordan to gather the information required. The second one comprises of items which are based on the various factors identified in the literature review.
