### Title and Abstract of the Doctoral Thesis (within 150 words)

## "Impact of Knowledge Network Elements on the Technological Strategy of the Jordanian Drugs Manufacturing Organizations"

### Abstract

The aim of this thesis was to recognize the impact of knowledge network elements presenting the independent variables (Research & Development; Database; Core Competences; and Know-how) on the

dimensions of technological strategy, which represent the dependent variables (innovation of new products and processes; continuous improvement of products and processes; and market development). The population of the study consisted of 17 drugs and pharmaceutical appliances manufacturing organizations in Jordan that are registered in the records of the Jordanian Association of Manufacturers of Pharmaceuticals and Medical Appliances in 2006. A sample of 10 organizations was selected from (17) organizations in the given sector. The selection was done by a simple random sample. However, the secondary sampling units represented (185) respondents in every industrial organization, who represent the population framework. Afterwards, a simple random sample of (75) respondents was taken to be analysed by both the One-Way Multivariate Analysis of Variance (MANOVA), and the Analysis of One-Way Variance (ANOVA).
